APAC Aluminium J Pole Fascia Mount, 1.8m

AP-FM-J-1.8

Key Features

- Easy-to-carry mounting solution
- Low maintenance aluminium construction
- 1.8m height standard, customisable
- Made locally in QLD

Overview

APAC's AP-FM-J is a mounting solution designed for securing antennas or similar equipment to building fascias. With a mast length of 1.8 metres and a 32 mm pole diameter, this J-Pole features a curved design, often referred to as a "Hockey Stick," which is particularly useful for providing clearance around drainage gutters. This design facilitates the installation of antennas in locations where obstructions might otherwise impede signal reception or transmission.

Constructed entirely from aluminium, the J Pole is both lightweight and resistant to corrosion, making it suitable for outdoor use in various environmental conditions. Manufactured locally in Sunshine Coast, Queensland, the product includes a mounting plate with pre-drilled holes, simplifying the installation process.

Specification

Parameter	AP-FM-J-1.8
Physical Specifications	
Subtype	**Mounts**
Height (Nominal)	**1.8 m**
Materials	**Aluminium**
Material Finish	**Bright/Pickled Finish**
Weight	**5 kg**
Installation	**Wall Mounted**
Mounting	**Screw / Bolt** **Wall / Vertical Surface**
Interfaces	
Installation / Attachment	**Quantity**: 2; **Mounting**: Screw / Bolt
Payload Interfaces	**Quantity**: 1; **Interfaces**: Pole 32 mm ⌀; **Notes**: For equipment/brackets

Australian designed and manufactured infrastructure for public safety and first response, built on the Sunshine Coast, Queensland. Need a variation on this design? Our team can engineer it to suit your site.
