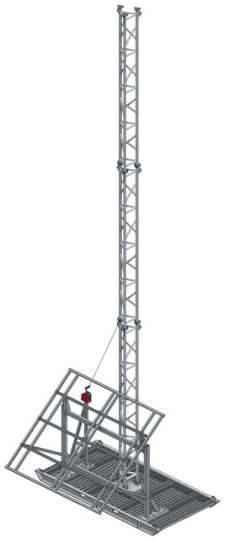
GSK3 Galvanised Steel Skid with Solar Frame, 10m Winch-Raised AL340 Tower

AP-GSK3-EMF-SF2-AL340-10



Key Features

- Lease and short-term hire options available
- Winch-raised AL340 tower, 4, 7 or 10 metres
- GSK3 galvanised steel skid with expanded steel mesh floor
- Two-panel tilting solar frame

Overview

This galvanised steel skid carries a winch-raised AL340 lattice tower with its own solar frame. It is built on APAC's GSK3 skid base module: a 3000 x 1500 mm fully galvanised steel subframe designed to be fork-lifted via its fork-pockets, or lifted/dragged from its lifting points.

The standard design has a two-panel tilting solar frame, and mounting positions suitable for a range of field cabinets and enclosures. It is supplied standard with an expanded steel mesh flooring, with GRP anti-slip flooring options also available.

Operation of the AL340 10 metre lattice tower is straight forward - a 1.2 tonne hand winch and gin-pole system provides for the safe raising and lowering of the tower.
