Serrated Pipe Clamp, Stainless Steel

AP-FSS-SPC

Key Features

- 3 mm 304 grade stainless steel
- Clamping range 30mm to 114mm
- 90 degree pressed (35x30x35)
- Customisable to your spec

Overview

Manufactured from 304 grade stainless steel, this serrated clamp bracket provides high corrosion resistance and durability in demanding environments. Formed from 3 mm thick material with precision 90° pressed ends (35 mm × 30 mm × 35 mm), it delivers consistent structural integrity and reliable engagement. The integrated serrated profile enables secure, incremental positioning across a clamping range of 30 mm to 114 mm, ensuring stable load retention and minimising slip under mechanical stress.

Designed for straightforward installation, the clamp features mounting holes spaced at 200 mm centres for compatibility with standard fixing arrangements. Its solid construction and adaptable geometry make it suitable for a wide range of structural, fabrication, and mounting applications. With thousands of units held in stock locally in Sunshine Coast, this component supports immediate availability for both small-scale and high-volume requirements.
