Reducer Module for AL340 Aluminium Lattice Towers

AP-AL340-RED

Key Features

- 76.2 mm structural grade billet Clevis Eye
- Precision machined hinge
- Compatible with any AL220/340 Clevis Fork
- Part of the AL220/AL340 Ecosystems

Overview

The Reducer Module is required to attach AL340 aluminium lattice tower modules onto a single clevis base. It is a necessary component to construct guyed lattice towers up to the maximum height for the AL340 series.

The Reducer Module interfaces with the AL220/AL340 Series' Billet Base Plate. The Reducer Module has a Clevis-Eye which slots into the Billet Base Plate's Clevis-Fork.

It has a flat interfacing plate with the AL340 bolt pattern routed out for easy bolt-together attachment of AL340 tower modules.
