Turnbuckle with Hook and Eye - Galvanised, M12

AP-FST-TBHE-12

Key Features

- Galvanised or Stainless Steel

Overview

A hook and eye style turnbuckle is a tensioning device utilised for adjusting the tension and reducing slack in wire ropes or cables. It consists of a metal body with a threaded hook on one end and a threaded eye on the other, allowing for precise adjustments through the rotation of the central body.

This component is typically found as an item within APAC guy wire kits.
