AP-AL340-RTK-3.8G

Key Features

- Engineered to 25.5 metres in Wind Region C
- Roof mounted tower kit
- Structural grade aluminium construction
- Climbable modular guyed mast
- Large AL340 component ecosystem

Overview

APAC's AL340-Series is an extraordinarily versatile Modular Tower System (MTS), known best for its configurability and reconfigurability throughout its service life. Designed and manufactured locally in Queensland, AL340 is a flexible system that can be built as a Roof Tower, Ground-Mounted Tower, or connected to one of many APAC Modular Platforms such as our skids, jackframes, and trailers.

AL340 is a three-chord triangular aluminium lattice tower with a 340 mm face width, manufactured in 3.1 metre modules. Each chord/leg is 50x4 CHS with 32x3 CHS 6061-T6 structural aluminium lattice, providing incredible strength while retaining a lightweight design.

The 3.1 m sections are easily lifted and stacked, with full structural engineering certification up to 25.5 metres in Wind Region C and up to 41 metres in Wind Region A.

The AL340 Roof Mounted Tower kit comprises of:

- 3.1 metre tower modules, stacked to your required height
- Tetrahedral reducer module and multi-axis hinged base
- Guy wire kits matching your requested height
- Roof cleats for securing guy wires
