AL340 Torque Arm - Anti-Twist for Guyed Towers

AP-AL340-TA

Key Features

- Up to six-way guying
- Bolt-together aluminium design
- Increases torsional resistance on AL340 guyed towers
- Part of the AL340 Ecosystem

Overview

Anti-twist torque arm assemblies are used to provide up to six-way guying to increase torsional resistance on towers supporting microwave/pencil beam antennas or surveillance cameras.

Attached to standard APAC AL340 aluminium lattice towers at any section by three heavy duty jaw clamps. This system has been designed specifically to match APAC AL340 ground and roof mounted aluminium lattice towers (340 mm faced, 50 x 3 mm round tube).

This is a subcomponent of the AL340 Anti-Twist Torque Arm Kits which are supplied to match your tower height, however this can be supplied as a stand-alone part if requested.

Specification

Parameter	AP-AL340-TA
Physical Specification	
System	**AL340**
Subtype	**Attachment**
Materials	**Aluminium**
Mounting	**AL340 Triangular Uprights**
Dimensions	**833 × 728 × 58 mm**
Weight	**11.5 kg**
Interfaces	

Installation / Attachment

Quantity	Mounting	Notes
1	AL340 Triangular Uprights	3x U-Bolts clamp around AL340 upright

Subcomponents

Quantity	Item	Materials	Material Finish
1	Bolt together assembly	Aluminium 6005-T5	Bright/Pickled Finish

Quantity	Bundled Components
3	U-Bolt, 50 mm Rounded, 100 mm Long (AP-FST-UB50-100)

Australian designed and manufactured infrastructure for public safety and first response, built on the Sunshine Coast, Queensland. Need a variation on this design? Our team can engineer it to suit your site.
