APAC Aluminium Deployable Technology Trailer, 6m Winch Up Mast

AP-T-ADT6M

Key Features

- Six metre dual-stage aluminium mast
- Simple hand-winch operation
- Fully Structural grade aluminium chassis
- Affordable, customisable platform

Overview

Exported to the world, APAC trailers are 100% Australian designed, built, and shipped from our facility in the Sunshine Coast, Queensland.

APAC's Aluminium Deployable Trailer (ADT) series are a high performance, lightweight technology platform, designed to put gear into the field quickly and at an affordable price point. The ADT has an integrated low-maintenance 6 m dual-stage winch-up mast, providing a means of raising sensors, antennas, cameras, and more into the air above. Integrated enclosure mounting rails and solar frame allow you to BYO your electrical system or use one of ours.

Mast operation is simple - the dual-section telescoping mast is extended to desired length, locked into position using a heavy duty hitch-pin, and then raised using a 1 tonne winch system with dyneema rope.

ADT is no-nonsense, use it to put your gear where it needs to be.

Note: pictured with RF isolation screen - available as optional accessory.

Specification

Parameter	AP-T-ADT6M
Physical Specifications	
No. Axles	**1**
Materials	**Aluminium**
Material Finish	**Bright/Pickled Finish**
Outriggers	**1000 kg Levelling Jacks**
Braking System	**Mechanical Brakes**
Trailer Connector	**7-Pin Flat**
Trailer Coupling	**50 mm Ball Hitch**
Suspension	**Leaf Spring**
Weight	**760 kg**
Dimensions	**4,200 × 1,500 × 2,200 mm**

Australian designed and manufactured infrastructure for public safety and first response, built on the Sunshine Coast, Queensland. Need a variation on this design? Our team can engineer it to suit your site.
