APAC Hydraulic Container Tower Platform, up to 18.4m

AP-DTPHCT-18

Key Features

- 40 tonne hydraulic lifting system
- Tower configurations from 6.4 to 18.4 metres
- Self-contained in 20' shipping container
- Power system options available

Overview

APAC's range of Deployable Technology Platforms reaches its most serious with its Hydraulic Container Tower (HCT) series. The HCT is supplied as a single 20 foot shipping container, and unpacks to allow assembly of tower heights up to 18 metres.

The tower is designed to be ground-assembled using its ALS800 4 metre aluminium tower modules, and raised into position with its 2.4 m GT800 steel lifting module.

The 20' container provides a natural ballast and footprint for anchoring, as well as supporting the integration of a range of solar and genset power options. These are of course not off-the-shelf, we will need to work with your team to put together a solution to match your requirements.
