Aluminium Beach RWC Launch Dolly

AP-T-SLS-RWCLD

Key Features

- ATV wheels
- 6061-T6 structural grade aluminium chassis
- Solid 40 mm stainless steel axles
- 22 rollers, 800 kg carrying capacity
- Towable by SSV

Overview

APAC's Surf Lifesaving trailer series are 100% designed and manufactured in Sunshine Coast, Queensland, purpose built for Surf Lifesaving clubs across Australia.

Our Aluminium RWC Launch Dolly was designed in house for the use of Seadoo and Yamaha RWCs, This build is very simple, to keep costs down and supply you with an RWC launching dolly that you will have for years to come.

The design allows the RWC to sit idle on the beach ready to launch, can be operated by two members or one SSV.

Its removable drawbar can be attached both ends, this allows the operator to load the ski on front ways, once the dolly is on the beach its as simple as detaching the drawbar, spinning it around, and the ski is ready for another launch.

We're more than happy to supply this design as-is, customise aspects of it, or we can fully tailor the build to meet your requirements.
