Dual Arm Standoff Mount for AL340 Towers

AP-AL340-SOMDA

Key Features

- Clamps to AL220/AL340 towers with supplied U-bolts
- Low maintenance 50 mm alloy tube construction
- Heavy duty 10 mm interface plate
- Fully customisable, built to specification

Overview

Standoff mounts such as this U-bolted mount are designed to position antennas, CCTV cameras, sensors, and other equipment away from the primary aluminium tower structure. They're also known as stand-off or offset mounts. We design and fabricate these mounts locally in Sunshine Coast, Queensland alongside our aluminium tower products, allowing us to build to your requested dimensions.

This mount is constructed from 50 mm O/D structural grade aluminium tube with a bright acid finish. The standard design is a 900 mm upright with two 500 mm horizontal arms providing the offset. Dual arm mounts provide superior vibration resistance and vertical deflection over single arm mounts. These are suitable to an offset distance up to about 1000 mm before additional stiffening is required, depending on the payload sail area.

This alloy series is dimensioned to match the AL220 and AL340 tower series, with 50 mm U-bolts for the AL340's chords and 40 mm U-bolts for the AL220's. We can of course fabricate to your requirements.

Specification

Parameter	AP-AL340-SOMDA
Physical Specification	
System	**AL220** **AL340**
Subtype	**Stand-Off Mount**
Materials	**Aluminium**
Material Finish	**Bright/Pickled Finish**
Mounting	**Pole Clamp 30 to 52 mm ⌀**
Dimensions	**598 × 100 × 900 mm**
Weight	**3.9 kg**
Interfaces	
Installation / Attachment	**Quantity**: 2 — **Mounting**: Pole Clamp 30 to 52 mm ⌀
Available Interfaces	**Quantity**: 1 — **Interfaces**: Pole 50 mm ⌀ — **Notes**: For attaching ordinary equipment

Subcomponents

Quantity	Item	Materials	Material Finish
1	Welded Assembly, 50x3 mm Tube to 10 mm Plate	Aluminium 6005-T5	Bright/Pickled Finish

Quantity	Bundled Components
4	U-Bolt, 50 mm Rounded, 100 mm Long (AP-FST-UB50-100)
