GS89 Steel Mast Headframe, 2-Sector

AP-GS89-HF2

Key Features

- 2x 900 mm height, 48.3 mm diameter pipes
- Hot-dip galvanised steel construction
- 100x100 socket with tap bolt securing
- Part of the GS89 ecosystem

Overview

APAC's GS89 galvanised steel headframes are designed to slip over the top of any GS89 series mast. The 100x100 socket secures over the 89 x 89 mm mast with the supplied 4x M12 tap bolts. The term spigot, tenon, and single-tube headframe are used interchangeably.

Two-Sector headframes, also known as butterfly mounts, provide two uprights offset from the central mast, doubling the real estate available for mounting equipment. The standard offset distance for GS89 mounts is 500 mm but fully customisable on request.

Constructed from a 900 mm (0.9 metre) length of 48.3x2.9 mm Circular Hollow Section welded to a 100x100 SHS socket. The central column is capped to prevent water ingress.

Specification

Parameter	AP-GS89-HF2
Physical Specification	
System	**GS89**
Subtype	**Headframe**
Materials	**Steel**
Material Finish	**Hot-Dip Galvanised**
Mounting	**GS89 Socket (100x100)**
Dimensions	**1,048 × 130 × 1,215 mm**
Weight	**20.1 kg**
Interfaces	

Installation / Attachment

Quantity	Mounting	Notes
1	GS89 Socket (100x100)	Mounts over a GS89 spigot

Available Interfaces

Quantity	Interfaces	Notes
1	Pole 48 mm ⌀	For clamping ordinary equipment
1	Pole Spigot, 48 mm ⌀ OD	For attaching equipment over the top of the pole

Subcomponents

Quantity	Item	Materials	Material Finish
1	Fully welded assembly	Steel	Hot-Dip Galvanised

Quantity	Bundled Components
4	Hex Bolt, Hot-Dip Galvanised 8.8 - M12 x 30mm Standard Thread (AP-FST-HXB-HDM12-30)
4	Hex Nut, Hot-Dip Galvanised Class 8 - M12 Standard Thread (AP-FST-HXN-HDM12)

Australian designed and manufactured infrastructure for public safety and first response, built on the Sunshine Coast, Queensland. Need a variation on this design? Our team can engineer it to suit your site.
