ALS500 Hinged Aluminium Lattice Tower, Free-Standing - 3.1m

AP-ALS500-3.1

Key Features

- Gin-Pole Hinge Erection
- Rigid Stackable Design
- 3.1 to 9.3 m tower heights
- 500 mm wide body
- 3100 mm modular lengths

Overview

APAC's ALS500 modular free-standing aluminium lattice towers are manufactured locally in Queensland in 3.1 metre modules, permitting comfortable handling during transport and assembly. The ALS500 square-based (four-leg) module is a true-stackable design which can be used to build cost effective towers up to 9.3 metres (three sections), and of course much higher with guy-wire/supports.

A supplied gin-pole lever is used to raise the tower into position, and lowering for service. Ordinary free-standing galvanised towers have a tapered design, meaning final design height must be known well in advance of manufacturing, and each tower must be purchased as a single kit. ALS500 towers are designed to be manufactured and shipped as identical modules, arranged to any height as needed.

The towers are ordinarily supplied in a bright acid finish, but can be supplied painted in aircraft colouring, or high visibility for mining applications.

Specification

Parameter	AP-ALS500-3.1
Physical Specifications	
System	**ALS500**
Subtype	**Erexures**
Height (Nominal)	**3.1 m**
Materials	**Aluminium**
Material Finish	**Bright/Pickled Finish**
Weight	**152.7 kg**
Installation	**Ground Mounted** **Platform / Substructure**
Mounting	**S600 Bolt Pattern**
Interfaces	
Installation / Attachment	**Quantity** | **Mounting** | **Notes** 1 | S600 Bolt Pattern | Hinging Base Plate attaches to S600 (or suitable bolt cage foundation)
Payload Interfaces	**Quantity** | **Interfaces** | **Notes** 1 | ALS500 Bolt Pattern | For attaching additional ALS500 series modules/headframes

Subcomponents

Quantity	Bundled Components
1	ALS500 Hinged Base Plate & Gin Pole (AP-ALS500-HBP)
1	ALS500 Aluminium Modular Square Lattice Tower - 3.1m Base Module (AP-ALS500-BM)
